1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. **Prices are based on a unit of one (1) Labor Category for SIN 54151S. Prices are not based on geographic location.**

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item.

Labor Category Descriptions

Commercial Job Title: Senior Consultant

Minimum/General Experience: Seventeen years of progressively responsible experience involving information technology and related systems and often unique specialization. Recognized as an industry or specialty expert especially in the use of information processing, simulation or security systems, through exposure such as publications, research, teaching and speeches. Experience in traditional captioning with specialized expertise in combining captioning with subject matter suitable for digitization and/or with internet programming languages to synchronize multi-media objects.

Functional Responsibility: Expert consulting in highly specialized, leading edge solutions involving information technologies and methodologies. Provides highly technical specialized guidance with regard to automated solutions to complex information processing problems. Often called upon as a recognized specialist with unique knowledge and skills. Assumes major project planning and execution responsibility at enterprise level. Manages multiple enterprise level IT projects planning and execution such as long-range strategic planning. Directs all aspects of the information systems function. Determines operating philosophy of the organization and enforces enactment of philosophy. Analyzes complex complete systems solutions according to user, enterprise and industry trends. Recommends and implements ultimate solution to complex problems.

Minimum Education: Advanced degree in specialty area, information technology, computer science, operations research, engineering, mathematics or equivalent experience.

Commercial Job Title: Subject Matter Expert

Guide software development of subject specific applications (example: pilot for a flight system model).

Minimum/General Experience: Seventeen years of progressively responsible experience involving information technology and related systems and often unique specialization. Recognized as an industry or specialty expert especially in the use of information processing, simulation or security systems, through exposure such as publications, research, leadership positions, teaching and speeches.

Functional Responsibility: Expert consulting in highly specialized, leading-edge solutions involving information technologies and methodologies. Provides highly technical specialized guidance with regard to automated solutions to complex information processing problems. Often called upon as a recognized specialist with unique knowledge and skills. Assumes major project planning and execution responsibility at enterprise level. Manages multiple enterprise level IT projects planning and execution such as long-range strategic planning. Directs all aspects of the information systems function. Determines operating philosophy of department and enforces enactment of philosophy. Analyzes complex complete systems solutions according to user, enterprise and industry trends. Recommends and implements ultimate solution to complex problems.

Minimum Education: Advanced degree in specialty area, information technology, computer science, operations research, engineering, mathematics or equivalent experience.

Commercial Job Title: Project Manager

Minimum/General Experience: Twelve years experience in project or program management, systems management, systems engineering or the business/ technology directly relating to the assigned business segment. Five years of supervisory experience, in a lead or management role, with demonstrated success in the ability to staff and lead/manage technically oriented projects and personnel. Experienced

in directing large efforts as well as multiple concurrent smaller efforts. Knowledgeable of the federal contract and procurement regulations.

Functional Responsibility: Serves as the overall manager for a contract and lead for complex technical projects. Authorized single point of responsibility and authority to coordinate all activities of the project to meet deadlines and budgets and to resolve conflicting demands of users. Establishes costs and determines resource requirements. Responsible for the administrative, contractual and financial aspects of projects. Oversees the quality assurance efforts of the contract or project.

Minimum Education: Bachelor's degree in computer science, engineering, mathematics, business, management or equivalent experience.

Commercial Job Title: Software Development Manager

Minimum/General Experience: Ten years experience in systems engineering, the business or the technology directly related to the project. Five years of supervisory experience leading technically oriented projects and personnel. Experienced in directing large efforts as well as multiple concurrent smaller efforts.

Functional Responsibility: Provides management oversight and senior technical expertise at the highest level in recognized subject area of the assigned project. Establishes costs and determines resource requirements. Responsible for the administrative, contractual and financial aspects of task efforts.

Minimum Education: Bachelor's degree in computer science, engineering, mathematics, business or equivalent experience.

Commercial Job Title: Sr. SW Architect

Minimum/General Experience: Twelve years IT systems experience, with eight of the twelve using structured analytical and programming techniques at the systems level. Highly experienced at defining requirements, conceptualizing system design, evaluating alternatives and presenting recommendations. Well versed in the use and development of integrated tools for requirements analysis and system design. At least three years directing the efforts of other programmers.

Functional Responsibility: Defines, designs and specifies processes and procedures for developing complex information systems. Team Leader during the requirements analysis and system design phase of the system development life cycle. Performs the final approval review of documentation created to support analysis and design activities.

Minimum Education: Bachelor's degree in computer science, related technical field, or equivalent experience. Advanced degree is desirable, as is being recognized in the field as an expert.

Commercial Job Title: SW Architect

Minimum/General Experience: Ten years IT systems experience, with seven of the ten using structured analytical and programming techniques at the systems level. Highly experienced at defining requirements, conceptualizing system design, evaluating alternatives, and presenting recommendations. Experience in the use and development of integrated tools for requirements analysis and system design. Occasionally directs the efforts of other analysts and programmers.

Functional Responsibility: Defines, designs, and specifies processes and procedures for developing complex information systems. Team Leader during the requirements analysis and system design phase of the system development life cycle. Performs the final approval review of documentation created to support the analysis and design activities.

Minimum Education: Bachelor's degree in computer science, related technical field, or equivalent experience. Advanced degree in computer science, related field or equivalent experience is desirable.

Commercial Job Title: Sr. SW Programmer

Eight years IT systems experience using structured analytical and programming techniques at the systems level. Experienced at defining requirements, conceptualizing system design, evaluating alternatives, and presenting recommendations. Experience in the use of integrated tools for requirements analysis and system design. Able to direct the efforts of other analysts.

Functional Responsibility: Defines, designs, and specifies processes and procedures for developing complex information systems. Team Leader during the requirements analysis and system design phase of the system development life cycle. Oversees the creation of documentation that supports the analysis and design activities.

Minimum Education: Bachelor's degree in computer science, related field, or equivalent experience.

Commercial Job Title: SW Programmer

Minimum/General Experience: Six years of computer systems experience with at least three years performing analysis of information systems, procedures and processes and three years developing applications systems or subsystems.

Functional Responsibility: Performs complex analytical projects as part of a team during the system development life cycle. Analyzes processes and procedures and creates program designs based on the analysis. Develops programs in accordance with approved system/subsystem design specifications. Tests unit code modules. Creates documentation supporting the analysis, design, and development activities.

Minimum Education: Bachelor's degree in computer science or related field or equivalent experience.

Commercial Job Title: Systems Engineer

Minimum/General Experience: 10 years of electrical and computer architecture and design to include design of PC board level fabrication. Additional experience directly involved in the wiring and fabrication of complex systems, subsystems, or networks.

Functional Responsibilities: Architecture and design of electrical and mechanical panels, switches and related electrical and mechanical equipment.

Minimum Education: Bachelor's degree in computer science or related field or equivalent experience.

Commercial Job Title: Quality Assurance Specialist

Minimum/General Experience: *10 years of writing QA guidelines, conducting quality assurance audits, monitoring and recording results from processes and procedures within the software development process. Continually compared results to predetermined expected ranges and take corrective measures if any deviation is found.*

Functional Responsibilities: Develop and document QA procedures tests, measure and document on-going results to produce better quality software products.

Minimum Education: Bachelor's degree in computer science or related field or equivalent experience.

Commercial Job Title: Programming Analyst

Minimum/General Experience: Three years experience in technical/policy support and analysis of complex programs, tasks, processes and procedures or combination of specialized certifications. Experienced in program planning, training, coordination, implementation and documentation.

Functional Responsibility: Responsible for applying research, specialized technical and analytical skills and techniques in the support of implementation responsibilities related to major operations. Assists in the definition of program requirements, assessment of required resources, identification of processes and procedures, addressing of outstanding issues for resolution and description of alternative approaches. Proposes and/or develops methodologies for the redaction of operation/program data into appropriate electronic/hard copy format.

Minimum Education: Associate's degree and one year experience in related field, or equivalent experience, and/or specialized certifications or a combination thereof.

Commercial Job Title: 3D Computer Graphics Specialist

Minimum/General Experience: Six years experience in developing 3-dimensional models and computer graphics, with experience in supporting Multimedia and Graphic Design.

Functional Responsibilities: Developing 3D shapes and models using industry standard tools. Developing computer graphic images to be used in Multimedia presentations.

Minimum Education: Associate's degree or equivalent experience.

Commercial Job Title: Configuration Management Specialist

Minimum/General Experience: Ten years IT systems experience, with six of the ten using configuration management and version control tools. Experienced in using UNIX and Microsoft development tools for the management of multiple code sources.

Functional Responsibility: Provides the daily operations management of the source code set as well as executable build tools and multiple execution binaries. Oversees the creation of documentation that defines the software build and management structure.

Minimum Education: Bachelor's degree in computer science, related field or equivalent experience. Advanced degree in computer science, related field or equivalent experience is desirable.

Commercial Job Title: Sr Security Administrator

Minimum/General Experience: Eight years experience with database management systems, with at least five years supporting relational database management systems. Well versed in the use of integrated tools for requirements analysis and system design. Able to direct the efforts of other data analysts.

Functional Responsibility: Designs the architectural layout of databases, designs access levels to the databases, assures the security levels of the databases and troubleshoots the performance of databases.

Minimum Education: Degree in computer science, related technical field or equivalent experience.

Commercial Job Title: Security Administrator

Minimum/General Experience: Four years experience with database management systems, with at least two years of the four supporting relational database management systems.

Functional Responsibility: Controls the global view of databases, controls access to the databases, assures the safekeeping of the databases and monitors the use of databases. Applies analytical and evaluative techniques to processes and problems. Determines requirements/defines problems, makes recommendations for optimum approaches.

Minimum Education: Degree in computer science or related field or equivalent experience.

Commercial Job Title: Senior Technical Writer

Minimum/General Experience: Seven years experience in the development of technical documentation using automated tools including desktop publishing. Experienced in developing user documentation in accordance with specified standards.

Functional Responsibility: Develops, writes, and edits documentation incorporating information from users, development personnel and management personnel. Develops reports from written and electronic input media. Prepares graphic presentations of technical information for both technical and non-technical users. Assists in requirements analysis and preliminary system design activities through participation in user interviews.

Minimum Education: Bachelor's degree in English, journalism or related field or equivalent experience.

Commercial Job Title: Technical Writer

Minimum/General Experience: Three years experience in the development of technical documentation using automated tools including desktop publishing. Experienced in developing user documentation in accordance with specified standards.

Functional Responsibility: Develops, writes, and edits documentation incorporating information from users, development personnel and management personnel. Develops reports from written and electronic input media. Prepares graphic presentations of technical information for both technical and non-technical users. Assists in requirements analysis and preliminary system design activities through participation in user interviews.

Minimum Education: Degree in English, journalism or related field or equivalent experience.

Commercial Job Title: Senior Network Administrator

Minimum/General Experience: Ten years technical experience including five years supporting network environments. Knowledge of network management tools and techniques. Experienced at troubleshooting network performance.

Functional Responsibility: Provides technical support in evaluating and resolving network and processor problems. Responsible for the design, configuration, and implementation of networks.

Minimum Education: Bachelor's degree in computer science or related field or equivalent experience.

Commercial Job Title: Network Administrator

Minimum/General Experience: Six years technical experience including three years supporting network environments. Knowledge of network management tools and techniques. Experienced at measuring and reporting network performance.

Functional Responsibility: Provides technical support in evaluating and resolving network and processor problems. Responsible for the configuration and implementation of networks.

Minimum Education: Associate's degree in computer science or related field or equivalent experience.

Commercial Job Title: Senior Systems Administrator

Minimum/General Experience: Six years computer administration experience including four years supporting daily operational activities of complex UNIX, mainframe and other network servers, subsystems or networks.

Functional Responsibilities: Ensures system availability and functionality. Designs user account management, security management and system backup procedures.

Minimum Education: Bachelor's degree or equivalent experience.

Commercial Job Title: Systems Administrator

Minimum/General Experience: Three years computer administration experience supporting daily operational activities of complex systems, subsystems or networks.

Functional Responsibilities: Ensures system availability and functionality. Performs user account management, security management and system backups in accordance with established procedures.

Minimum Education: Associate's degree or equivalent experience.

Commercial Job Title: Systems Technician

Minimum/General Experience: Three years electrical and computer fabrication experience directly involved in the wiring and fabrication of complex systems, subsystems, or networks.

Functional Responsibilities: Basic wiring and fabrication of electrical and mechanical panels, switches and related electrical and mechanical equipment.

Minimum Education: High School diploma and 2 years technical experience.

Commercial Job Title: Data Entry Clerk

Minimum/General Experience: One year experience using a computer.

Functional Responsibility: Performs telephone communications, assists operations staff in preparing task documents and operates hardware/software systems. Other support services include data entry, software licensing, property management, receiving, systems operation and data mining. Verifies data entered, where applicable.

Minimum Education: High school diploma or equivalent experience.

Note: For all positions minimum Education criteria can be adjusted in lieu of documented equivalent professional experience as acceptable for the customers.

2. Maximum order. **\$500,000.00**

3. Minimum order. **\$100.00**

4. Geographic coverage (delivery area). **50 United States and US Territories.**

5. Point(s) of production (city, county, and State or foreign country). **Fort Worth, TX 76118**

6. Discount from list, prices or statement of net price.

3% for Purchase Orders up to 2,999 hours

12% for Purchase Orders equal to or greater than 3,000 hours
